Mr. Don Guthrie
Polk County Health Department
P.O. Box 1400
Winter Haven, Florida 33880

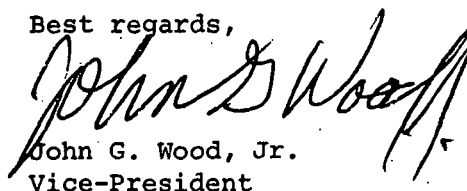

Dear Don:

I would like for you to send me a letter outlining the radon gas problem associated with our Woodlake project in Lakeland, Florida. Please include what studies have been made concerning the problem, the status of governmental investigation of the problem, model ordinances, the number of homes in the Polk County area that are potentially affected by the problem, and a comparison of this potential health danger to other dangers such as cigarette smoking. In requesting this information, I am trying to evaluate in a comparative sense the potential danger that radon gas poses to the public health.

I would also like your recommendation on what type of building methods may be used to eliminate or greatly reduce the radon gas problem in connection with new construction. Please advise me of what measures other builders have taken in the Lakeland area to eliminate the radon gas problem when building on reclaimed phosphate land.

Your attention to this matter is greatly appreciated and if you have any questions please do not hesitate to contact me.

Best regards,

John G. Wood, Jr.
Vice-President
